

# A Simple Guide to Sigils

⌘by urks⌘

↔ harbinger of chaos ↔

## *What are sigils and why are they made?*

In Chaos Magick, sigils are symbols that represent a desire or manifestation of the magician's will. Sigils are often a boiled-down form of a positive, present-tense phrase, for example "I am in a fulfilling relationship," or, "I have overcome my smoking

habit.” By focusing your intent, you are better able to make your desire into a reality. *Just be sure to only use it for good!*

### *How is a sigil used?*

The fun part of Chaos Magick is that there are no set rules-- if something feels right to you, go with it!

⌘ ***Charging***-- charge up your sigil with energy, often in a state of “gnosis,” a trance-like state (such as through meditation, dervishes, post-orgasm, etc). You can also go a slow-burn route and place your sigil in a conspicuous location that you will see daily, charging it as you see it (some say that

corporate logos are like sigils, gaining power as we consume the ads & products).

⌘ ***Launching***-- Some practitioners insist you need to destroy sigils after charging, or hide out of sight. Again, it's up to you and whatever feels right. When destroying a sigil, it is advised to match the

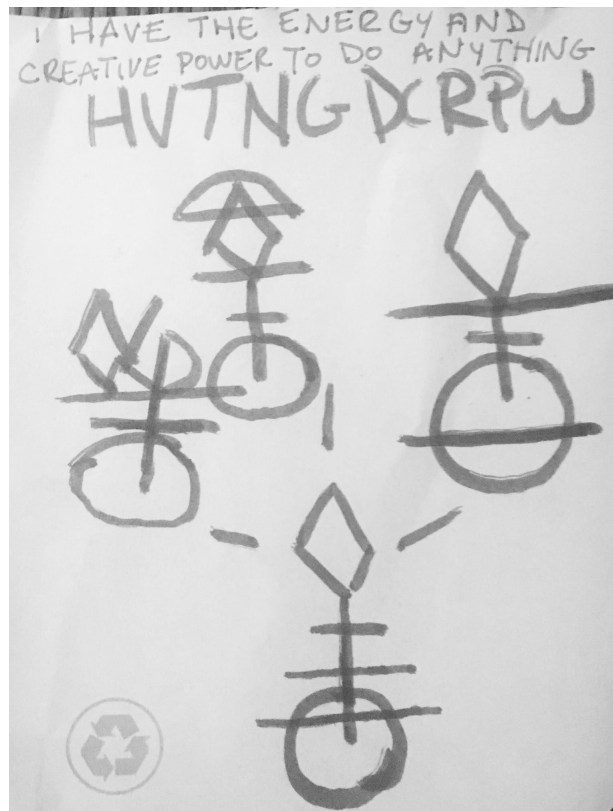

elemental energy of your original intention-- burn it, bury it, wash it away. Let intuition be your guide.

### *How can I make sigils?*

There is no wrong way to create a sigil, but a good way to start is to start with the desired phrase: <<**I Have the Energy and Creative Power to Do Anything**>>

Take out all vowels and any repeated consonants:

# <<HVTNRGDCPW>>

And then arrange the letters  
into shapes until it feels  
“right.”

Practice often, look at other magicians' sigils for inspiration, and keep a notebook to study the effects sigils have on your life.

Good Luck! May the Chaos Be With YOU!
